COMPANY NEWS

JV "KTM-2000" Ltd. was founded in 2000. Having started as a small dealer company, by 2013 our enterprise achieved the leading position on the market of constructing materials of the Republic of Belarus. At present "KTM-2000" is the first and the only manufacturer of decorative threshold for floor coverings, stair nosings, perforated profiles for ceramic tiles in the republic. Our company has developed engineering-technical and constructive base, machining workshops and the most modern in the Republic of Belarus line of anodizing of aluminum alloys.

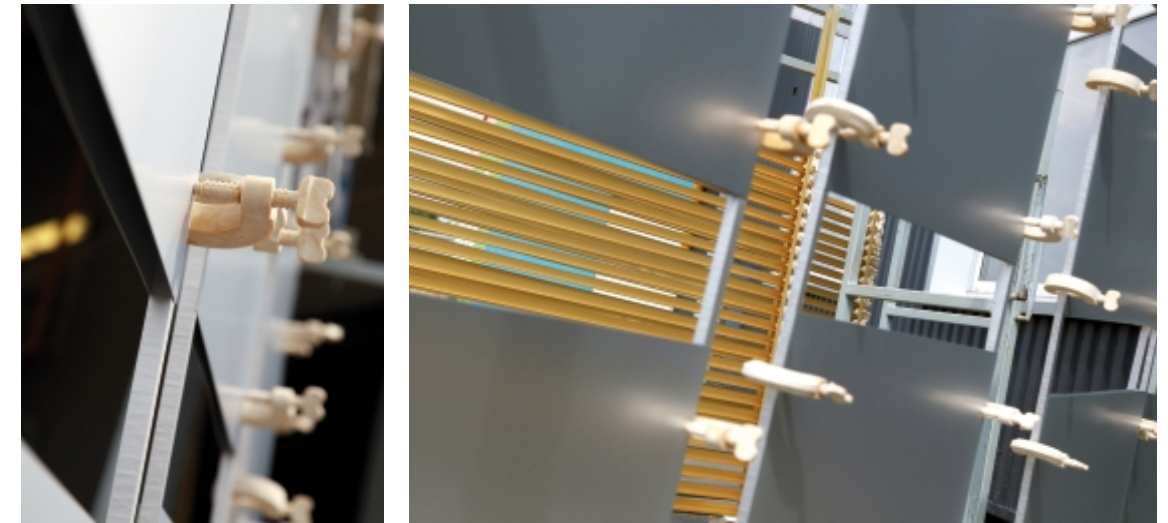

In 2012 on the basis of the anodizing workshop a new direction – the production of profiles for sliding wardrobes was launched. In addition we offer the full range of elements for self-assembly of sliding wardrobes. Such concept of individual assembling of the furniture provides the possibility for the development of the new trend in trade business.

COMPANY NEWS

In 2013 for the first time in the Republic of Belarus our enterprise mastered the unique production of anodized aluminum sheets without sealing (open-pored) used for metallographics. Moreover, our specialists were able to solve the hardest technological task, i.e. to achieve the homogeneous coloration into deep black color. The quality of the sheets manufactured by us was highly appraised by foreign experts.

Also in 2013 we mastered the anodizing of the details of different sizes. The possibility of anodizing into original colors, promptness of fulfillment of the orders and minimal order from 50 kg gives to our enterprise significant competitive advantages in comparison with larger plants.

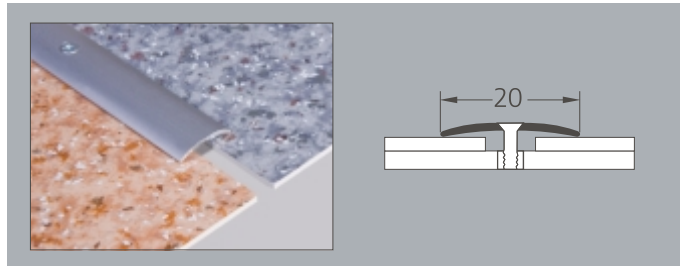

In 2014-2015 our enterprise is planning to:

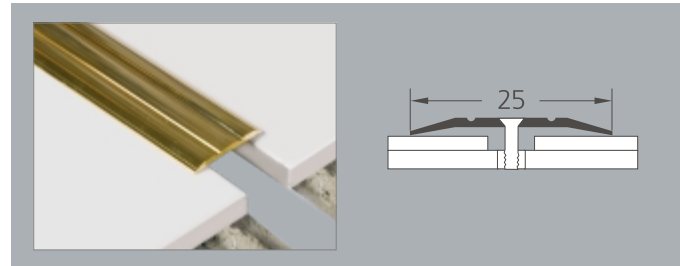

- implement and launch new colors of anodizing;
- extend the mechanic workshop and purchase the new equipment for brushing, polishing and shotblasting treatment;
- improvement of production flexibility by manufacturing of special titan racks for anodizing of complex details.

THRESHOLDS FOR FLOOR COVERINGS

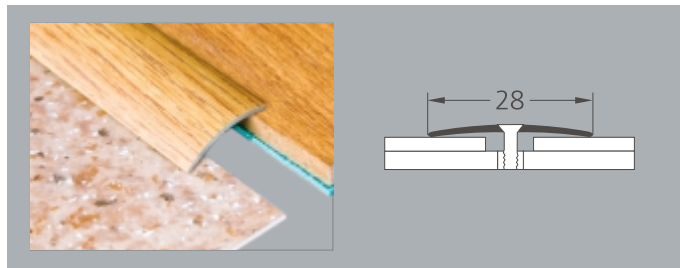

100 visible fixing, 0-2 mm level difference
color : 01, 02

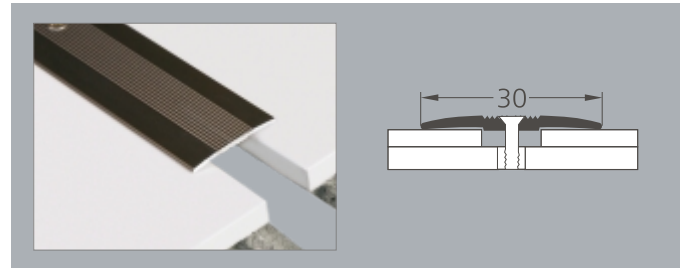

3329 visible fixing, no level difference
color : 01, 02, 017, 116, 117, 417, 617, 88

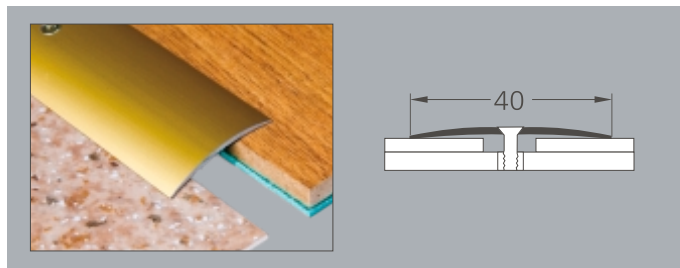

110 visible fixing, 0-3 mm level difference
color : 01, 02, 03, 04, 05, 06, 017, 116, 117, 308, 309, 310, 315, 316, 350, 417, 617, 717, 88

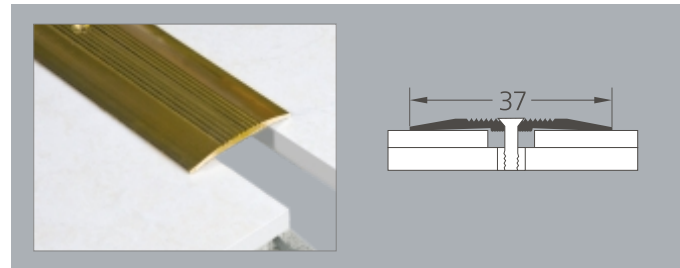

3586 visible fixing, no level difference
color : 01, 02, 04, 06

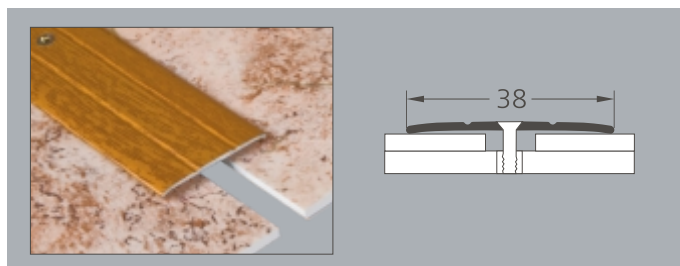

120 visible fixing, 0-5 mm level difference
color : 01, 02, 04, 06, 017, 116, 117, 308, 309, 310, 315, 316, 350, 417, 617, 717

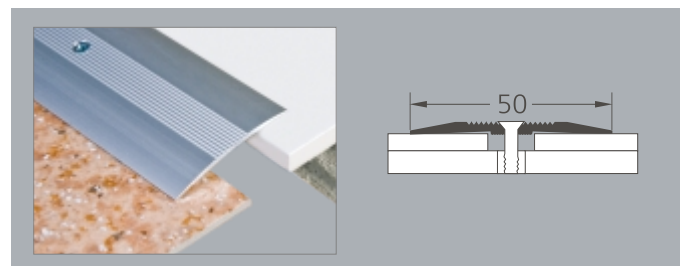

3328 visible fixing, no level difference
color : 01, 02, 88

3584 visible fixing, no level difference
color : 01, 02

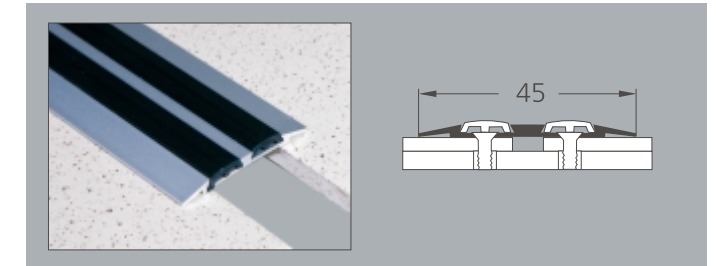

THRESHOLDS FOR FLOOR COVERINGS

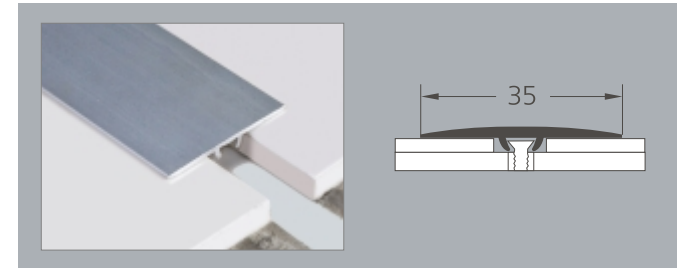

70 (035) invisible fixing, 0-8 mm level difference
color : 01, 02, 03, 04, 05, 06, 017, 116, 117, 308, 309, 310, 315, 316, 350, 417, 617, 717, 88

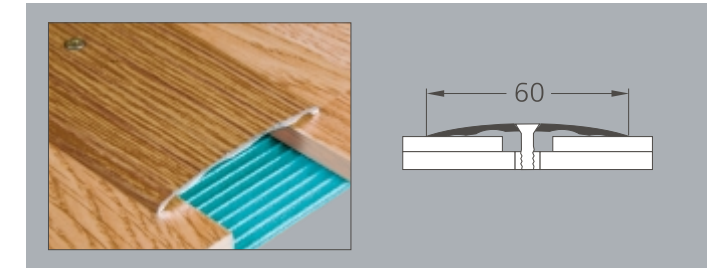

130 invisible fixing, no level difference
color : 01, 02

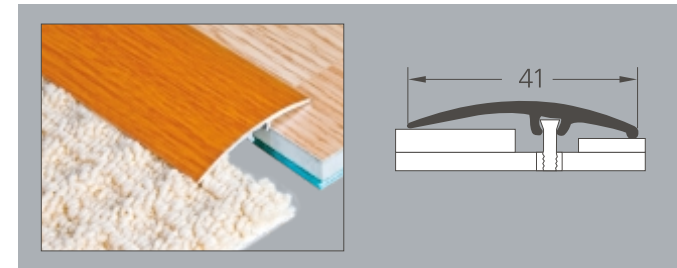

71 (034) invisible fixing, no level difference
color : 01, 02, 03, 04, 06

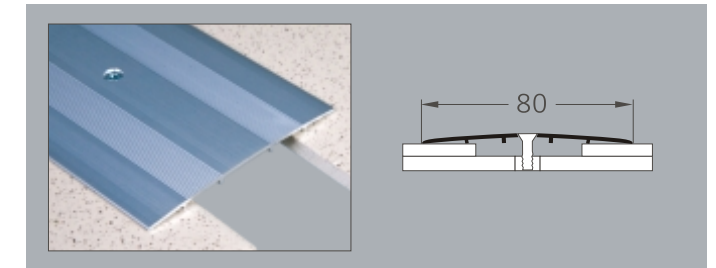

60 visible fixing, no level difference
color : 017, 116, 317, 217, 417

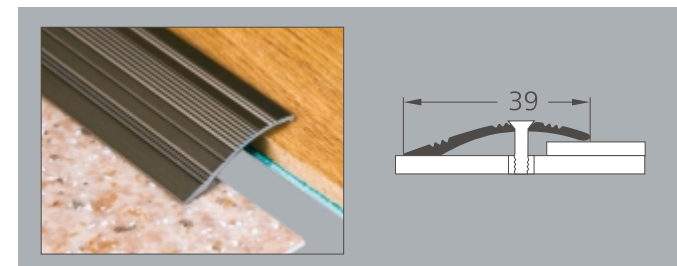

72 (033) invisible fixing, 0-13 mm level difference
color : 01, 02, 03, 04, 05, 06, 017, 116, 117, 308, 309, 310, 315, 316, 350, 417, 617, 717, 88

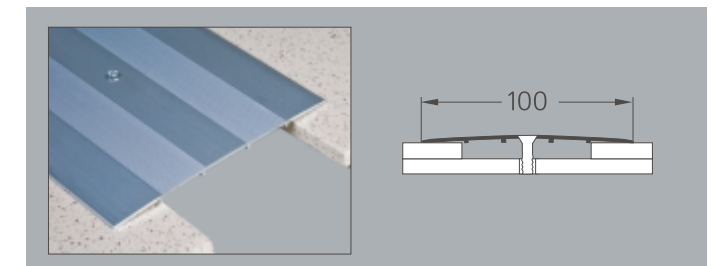

80 visible fixing, no level difference
color : 01, 02

3326 visible fixing, 0-16 mm level difference
color : 01, 02, 017, 116, 317, 217, 417

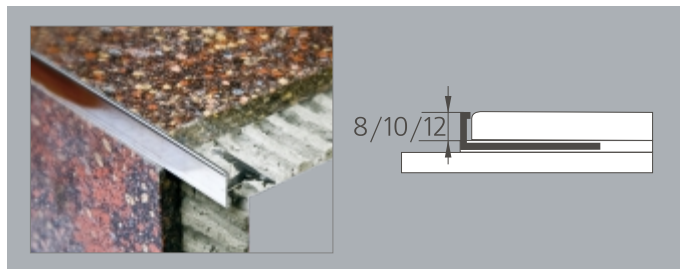

10 visible fixing, no level difference
color : 01, 02

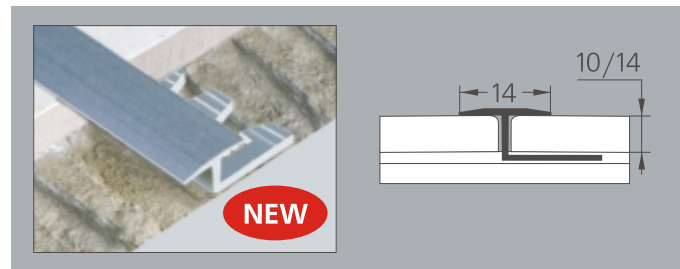

PERFORATED PROFILES FOR CERAMIC TILES

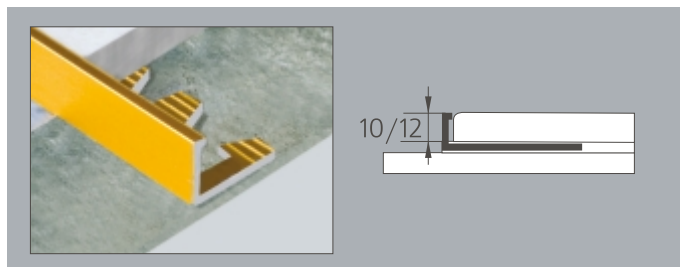

227/228/229 for straight finishing of tiles edges
color: 01, 02, 06, 77, 82

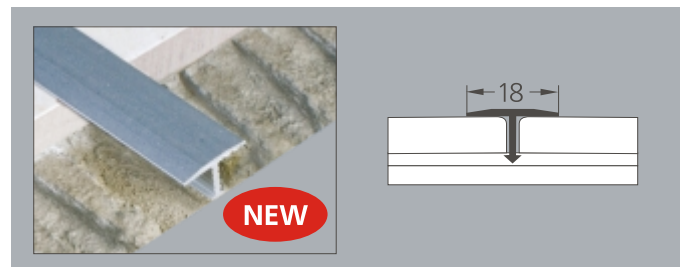

314/315 flexible, for jointing of connections
color : 01,02, 017, 310, 315, 417, 617

359/360 flexible, for finishing of tiles edges
color : 01, 02, 82

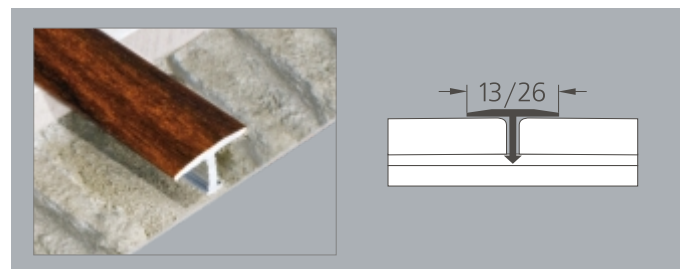

318 flexible, for jointing of connections
color : 01, 02, 88, 017, 116, 310, 315, 417, 617

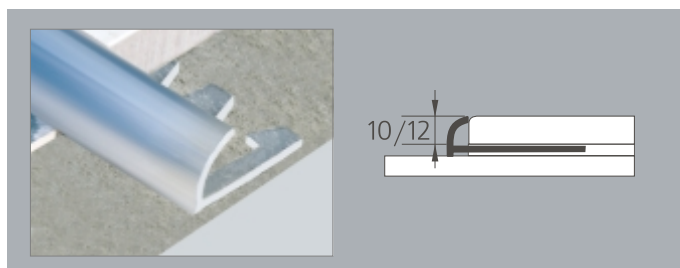

363/361/362 for external corners
color : 01, 02, 06, 82, 77,

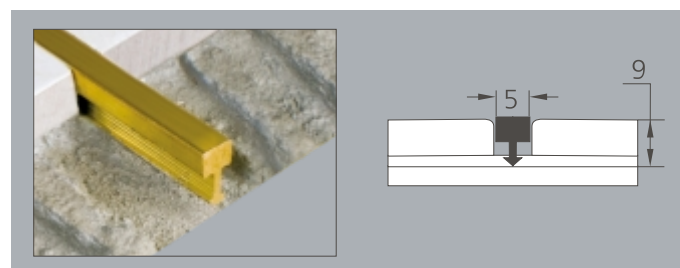

324/325 flexible, for jointing of connections
color : 01, 02, 017, 116, 310, 315, 417, 617, 88, 77

369/370 flexible, for angles and tiles edges
color : 01, 02, 82

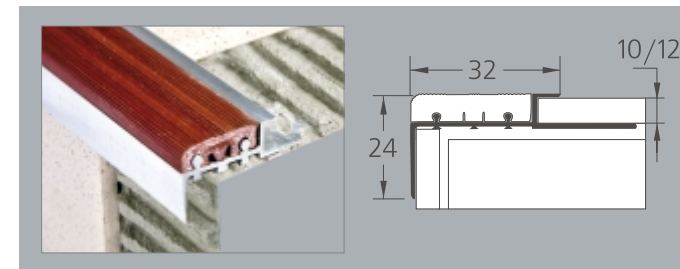

335 joint profile, for jointing of connections
color : 82

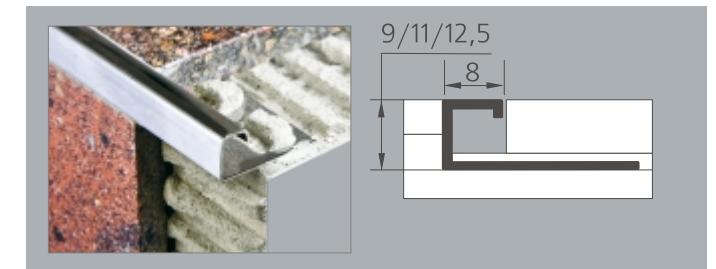

PERFORATED PROFILES FOR TILES

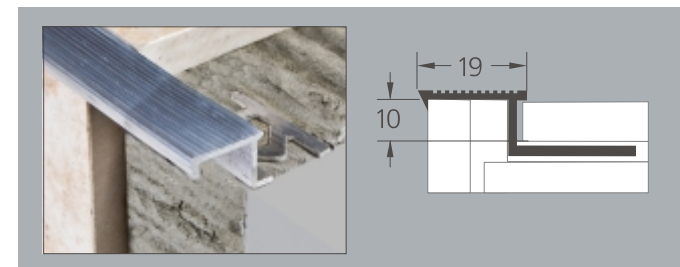

517/518 with rubber anti-slip insert
insert color : 51, 52, 53, 54, 55; цвет профиля : 00

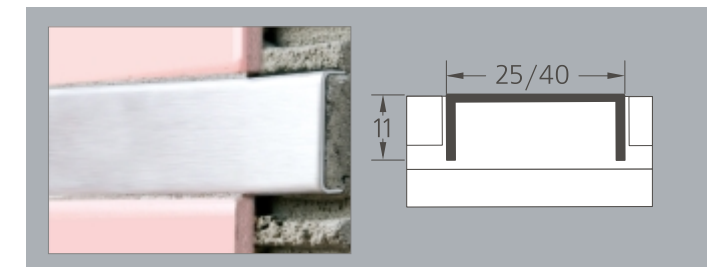

380/381/382 for corners and vertical surfaces
color : 77

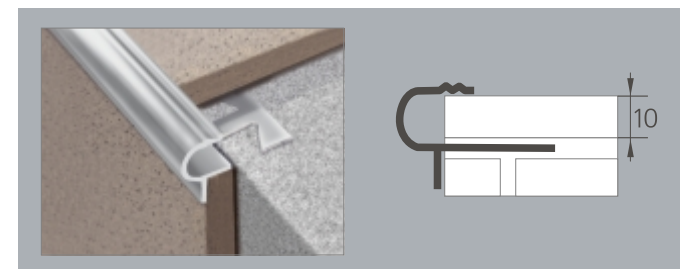

352 for ceramic tile stairs
color : 01, 02, 82

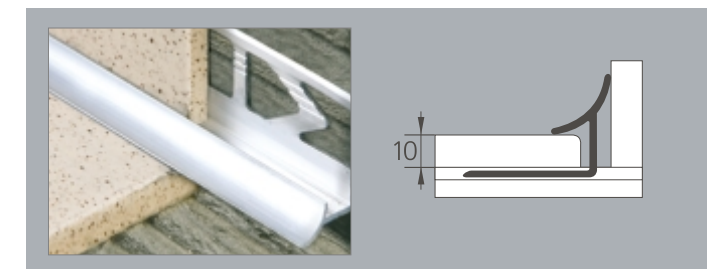

390/391 for separation of tiles
color : 71, 77, 70

356 for ceramic tile stairs
color : 01, 02

357 for internal corners
color : 01, 02

210/212 joint profile
color : 00, 71

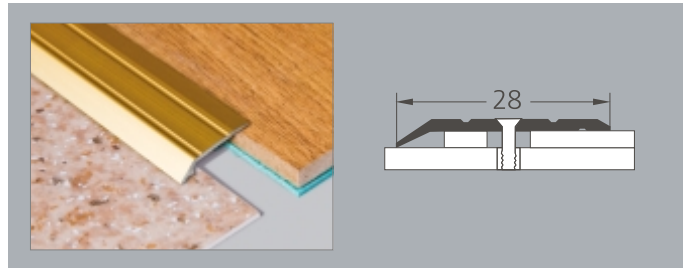

1010/1515/2525 protective angle
color : 71, 77

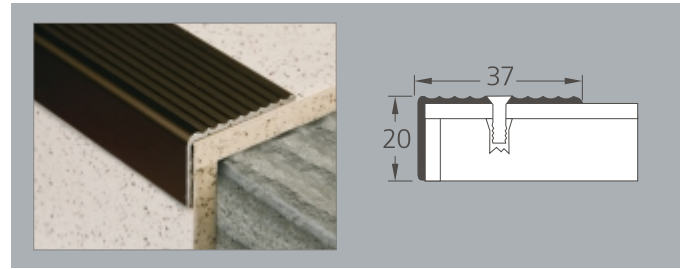

STAIR NOISINGS

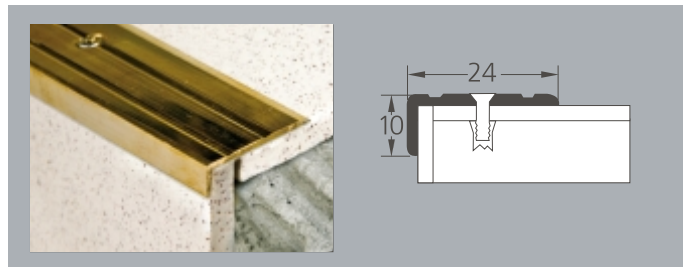

84 visible fixing, 2-4 mm level difference
color : 01, 02

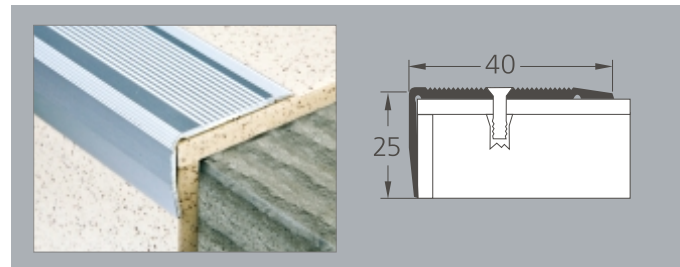

220 visible fixing
color : 01, 02, 03, 04, 05, 06

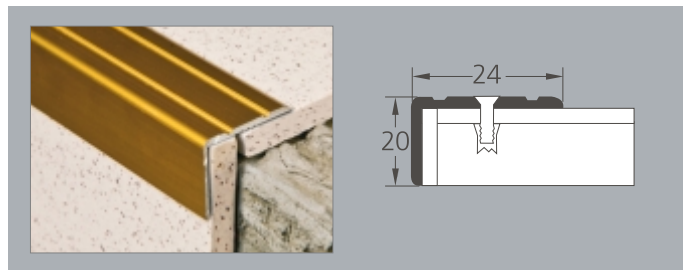

3418 visible fixing
color : 01, 02

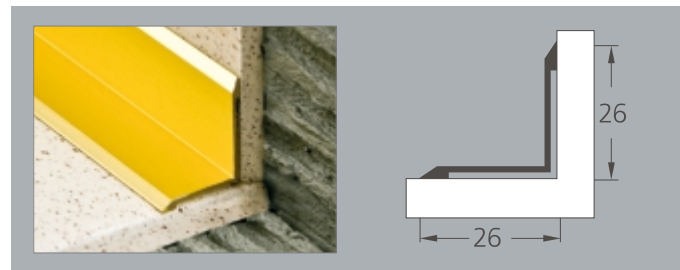

664 visible fixing
color : 01, 02, 04, 06, 117, 310, 315, 417, 617

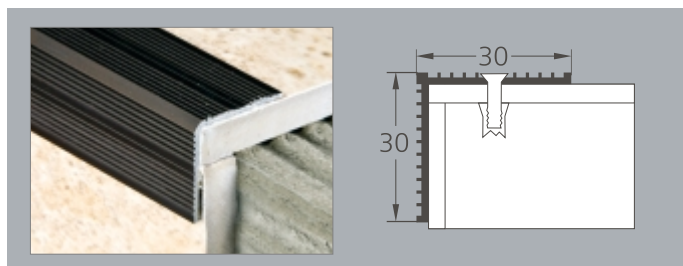

3414 visible fixing
color : 01, 02, 04, 06, 017, 116, 117, 308, 309, 310, 315, 316, 350, 417, 617, 717

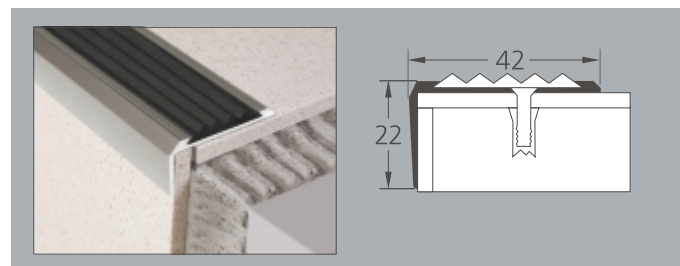

2626 invisible fixing
color : 01, 02

87 visible fixing
color : 01, 02

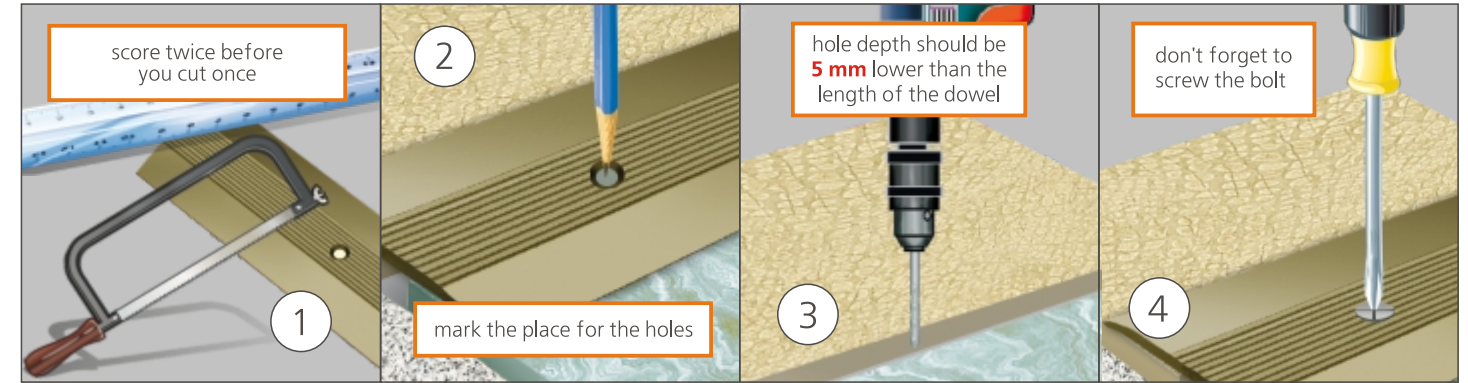

973 invisible fixing
color : 01, 02

SERVICES FOR PRINTING ON ANODIZED SHEETS

One of the new trends of our business is printing on anodized sheets. Information tables and stands, displays, badges, etc. are irreplaceable in the decoration of modern office, shop or mall. Metallographic technologies are actively used in architecture, design of the rooms and works of young artists. High quality printing, almost everlasting material and good appearance of the products provide the unlimited possibilities for the implementation of challenging projects.

Variants for the application of the printing on anodized sheets: architectural panels for facade finishing, panels for interior design, instrument panels, mnemonic diagrams, various information tables, memorial tablets, sign-plates, photographs, badges, shields, checks, etc.

The technology of printing on anodized sheets provides the product with some advantages: resistance to climatic and chemical influences (solvents and aggressive reagents), resistance to ignition, mechanical damage tolerance, including vandalism, graffiti (products can be easily cleaned by nitrosolvents).

SERVICES FOR ANODIZING AND MECHANICAL TREATMENT OF PROFILES, DETAILS AND ALUMINUM SHEETS

We offer services for anodizing on high-performance automatic equipment. Special hardware allows us to anodize not only profiles but details of different sizes. Our enterprise also mastered the unique manufacturing method regarding the production of anodized aluminum sheets used for metallographic purposes.

Coloring using electrochemical, chemical and interference methods makes it possible to obtain original colors and to fulfill individual orders. The size of baths allows us to process profiles, details and sheets up to 3x1.4x0.25 m. Coating thickness can vary between 10-25 microns. Line capacity – 600 tons per year. We accept orders starting from 50 kg.

In addition to anodizing we provide the following services involving mechanical processing, i.e. drilling, cross-cutting, cutting, milling, blanking, bonding, welding, brushing, shot-blasting and lamination.
